

Epic Simple Visit Coding

Improve efficiency, reduce/redirect coding staff and maximize your Epic investment with DeliverHealth

Healthcare leaders today face increasing demand for getting accounts coded and billed faster, and they're counting on HIM leadership and their coding team to get it done. Yet at the same time, HIM departments face a nationwide shortage of medical coders, creating a perfect storm.

Maximizing your Epic investment will improve coding efficiency and give coders the time they need to focus on more complex cases.

Get the most from Epic SVC through consulting and analytics.

DeliverHealth is skilled at helping health systems get the most from Epic Simple Visit Coding. Through consulting and analytics, we will give you all you need to maximize your SVC build. Our consultants develop a detailed project plan and implementation roadmap that outlines Simple Visit Coding opportunities, defines ROI and gives you a clear path forward. We'll also look for other areas where technology can help you close gaps and accelerate your revenue cycle.

Dive Deeper with SVC Analytics

Currently, Epic can only provide Simple Visit Coding analytics by request, and the data you receive is mostly outdated once you get it. With DeliverHealth's Simple Visit Coding solution, you will have analytics at your fingertips, in real-time. Our Power BI dashboards will help you track % SVC, % not SVC, SVC vs. internal goal and Gold % difference, why a coder had to touch an account, and more. The dashboards inform both education and process improvement at the department level, to ensure current and future optimization of no touch coding.

Benefits of Epic Simple Visit Coding

SVC automates the coding for relatively simple, high volume outpatient visits—such as lab, outpatient therapy visits, and some radiology visits—with no human intervention required. When optimized, Simple Visit Coding allows your coders to concentrate on more complex coding challenges, such as cases that include detailed reports or notes from a provider, while technology handles the rest.

- **Reduce or refocus coding staff on more complex coding cases**
- **Increase coding efficiency**
- **Reduce DNFB and AR**
- **Make billing more consistent**
- **Accelerate cash collection**
- **Use your EHR to its full potential**
- **Achieve EHR-specific recognition, such as an Epic Gold Star**

Let DeliverHealth show you how to make Epic Simple Visit Coding a reality today.
