

# PerformPlatform

## Coding and SmartAudit Workflow

Gain efficiency by infusing AI technology, streamlined workflows, edits, and SmartAudit tools to accommodate manual coding, partial automated coding, or full AI coding. Optimize your coding workforce and be armed with data and tools for provider communication and education.

## Proven 30% Coding Productivity Lift

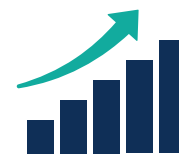

### Increase Efficiency. Optimize your Workforce

Powered by DeliverHealth's SuperChart AI, the platform supports intake, validation, reconciliation, and standardization of various file formats, from multiple sources. Workflow flexibility allows teams to scale quickly.

### Reduce Denials. Accelerate Revenue

Embedded audits and a robust rules engine promote coding accuracy. Edits fire during the active coding session preventing rework and mitigating downstream claim issues. Pre and post bill audits empower HIM leaders driving overall performance, education and quality.

### Define Success. Drive Results

PerformPlatform provides a myriad of options to accomplish quality coding and auditing. Within a single system, DeliverHealth offers optionality that does not exist in the market today. SaaS or full-service, human or AI, in-house or offshore? All possible with PerformPlatform.
